

NANDA KARRI

SENIOR DIRECTOR - IT INFRASTRUCTURE & DIGITAL TRANSFORMATION
(CLOUD | NETWORK | DIGITAL WORKPLACE | AI & AUTOMATION | GCC)

EXECUTIVE PROFILE

Senior IT Infrastructure & Digital Transformation Leader with 20+ years of global enterprise experience leading AI-powered modernization within large Global Capability Centers (GCCs). I manage a USD 50M annual global technology portfolio (CapEx + OpEx), scaling multi-region infrastructure operations and high-performance engineering teams while delivering sustained cost optimization, resilience, and execution velocity. I drive multi-cloud strategy (AWS, Azure, GCP), institutionalize CI/CD and NetDevOps across Network and Cloud, and consistently maintain global technology standards while balancing individual market and regulatory requirements to transform India Tech Centers into trusted global digital accelerators.

Leadership & Scale Snapshot – Operating Model

Global Team & Coverage

59 engineers (10 direct leaders, 49 indirect) across **India, China, UK & Europe**

Budget Managed

USD 50M (CapEx + OpEx)

Operating Model – Cloud, Network & Digital Workplace

I lead a **federated global operating model** with clear separation of **Engineering, Delivery, and Operations** across Cloud, Network, and Digital Workplace ecosystems:

- **Engineering:** Owns architecture, standards, automation frameworks, CI/CD, and future-state design across multi-cloud and network domains.
- **Delivery:** Drives global transformation programs, migrations, modernization initiatives, and enterprise rollouts with program governance and vendor coordination.
- **Operations:** Runs 24x7 production support, reliability engineering, incident response, capacity management, and service assurance through ITSM and SRE practices.

Key Achievements

Enterprise Digitization, AI & Automation Strategy

- Championed the enterprise-wide AI transformation agenda by deploying AI-driven ITSM automation on ServiceNow, delivering a 22% L1 ticket deflection and materially improving incident resolution SLAs across global operations.
- Drove large-scale developer productivity transformation by integrating Gemini Code Assist across a 1,000+ developer ecosystem, achieving a 14% increase in merge velocity and release throughput.
- Scaled enterprise knowledge intelligence through Copilot Studio and Microsoft 365 integration, compressing employee time-to-answer from 12 minutes to under 30 seconds, significantly improving workforce efficiency and decision velocity.
- Conceptualized and launched the proprietary ChatDNB AI engine, accelerating the lead-to-proposal lifecycle by 35% for the sales and business development organization while strengthening data governance and AI adoption controls.

Skills

Strategy + Operating Model

Enterprise & GCC Leadership

Cloud, Platform & Infrastructure Strategy

Network Engineering & Global Connectivity

CI/CD, NetDevOps & Automation

Digital Workplace & Endpoint Strategy

AI, Data & Platform Modernization

Financial, Vendor & Portfolio Governance

Security, Compliance & Risk

EXECUTIVE EDUCATION & PROFESSIONAL CREDENTIALS

CTO Program – Indian Institute of Management Lucknow (IIM-L)
Leadership with AI – Indian School of Business (ISB), Hyderabad
MBA (Information Systems) – Alliance University, Bangalore
B.Tech (Electrical & Electronics Engineering) – JNTU, Hyderabad
CCIE (Routing & Switching)
ITIL Foundation
Cloud Leadership Program
IT-OT Integration (Supply Chain & Value Chain Systems)

Languages

English (Fluent)

Hindi (Professional)

Telugu (Native)

Malayalam (Conversational)

Operational Excellence, Cloud & Infrastructure Modernization

- Led a global network modernization program using Palo Alto SD-WAN across branch operations, achieving a 38% reduction in latency and materially improving application performance and business continuity.
- Institutionalized NetDevOps operating models, collapsing infrastructure deployment cycles from 7 days to 6 hours, enabling continuous delivery with audit-grade change controls.
- Standardized multi-cloud provisioning across AWS, Azure, and GCP using Infrastructure-as-Code, reducing environment readiness time from 3 days to 30 minutes while improving compliance, security posture, and cost transparency.
- Modernized the global secure remote access platform (GP-VPN), driving a 60% reduction in security and connectivity failures and stabilizing remote workforce access at enterprise scale.

Cost Optimization, Portfolio Rationalization & Strategic Transformation

Hyderabad

- I lead **enterprise-wide cost governance and portfolio rationalization** across Cloud, Network, Digital Workplace, and Vendor ecosystems, ensuring sustained financial discipline across a **\$50M+ global technology portfolio**.
- I drive **multi-cloud cost optimization (AWS, Azure, GCP)** through workload right-sizing, reserved capacity planning, decommissioning of underutilized resources, and architecture modernization to improve unit economics without impacting performance or resilience.
- I institutionalize **FinOps operating models** in partnership with Finance and Global Procurement to enforce chargeback/showback, cost visibility, forecasting accuracy, and executive cost accountability.
- I lead **strategic vendor consolidation and contract renegotiation** across telecom, cloud, hardware, MSPs, and SaaS portfolios to eliminate redundancy, improve commercial leverage, and optimize total cost of ownership (TCO).
- I eliminate **legacy platforms and overlapping tools** through portfolio rationalization, standardizing on global platforms for collaboration, connectivity, security, and ITSM to reduce operational complexity and long-term run costs.
- I align **technology investment priorities with business strategy**, shifting spend from “run” to “transform” by funding automation, AI platforms, NetDevOps, and cloud-native modernization programs.
- I establish **ROI-driven governance for large transformation programs**, ensuring every modernization initiative is backed by financial, operational, and risk-adjusted business cases reviewed with global finance and executive leadership.
- I balance **cost optimization with resilience and regulatory compliance**, ensuring that financial efficiency never compromises global standards, security posture, or market-specific regulatory requirements.

Professional Experience

Director – IT (Cloud, Infrastructure & Networking), Dun & Bradstreet, Hyderabad | Jun 2021 – Present

JUN 2021 – PRESENT

- Lead global Cloud, Network, Digital Workplace, and IT Operations across multi-region GCC environments supporting large enterprise user bases.
- Own delivery of multi-year modernization programs across SD-WAN, multi-cloud, AI-driven ITSM, Digital Workplace, and Secure Remote Access.

- Partner with Global CIO, Finance, Security, and Business leaders to drive \$50M+ technology portfolio governance, cost optimization, and transformation execution.
- Stewarded multi-year transformation roadmap for GCC infrastructure enabling higher availability, faster delivery velocity, and sustained cost efficiency across global business unit

Senior Manager – Network Engineering, PepsiCo, Hyderabad

JUN 2019 – JUN 2021

Senior Lead – Network (Manager), Broadcom (CA Technologies), Hyderabad

FEB 2014 – JUN 2019

Senior Network Engineer, Tangent Test Technologies, Hyderabad

MAY 2006 – FEB 2014

Education & Certifications

CTO Program, Indian Institute of Management Lucknow (IIM L)

Leadership with AI, Indian School of Business (ISB), Hyderabad

MBA (Information Systems), Alliance University, Bangalore

B.Tech (Electrical & Electronics Engineering), JNTU, Hyderabad

CCIE • CCNP • ITIL Foundation • PMP • Cloud Leadership
